DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to an apparatus to add weight to an athletic ball striking bat, classified in class 473, subclass 457.
 - II. Claims 38-41, drawn to a method for fabricating a swinging sport-weighted implement, classified in class 29, subclass 284.
 - III. Claim 42, drawn to a weighting device comprising a donut shaped member, classified in class 473, subclass 437.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be formed in one piece and the weighted material can be retained in a retention means on the sleeve.
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 3711

claimed because the sleeve does not require an outer and inner fabric casing. The subcombination has separate utility such as for muscle building exercises.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I and III is not required for Group II, restriction for examination purposes as indicated is proper.

7. A telephone call was made to *Edward Bishop* on *31 August 2005* to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
